

Legg's Sausage Seasonings

Blend 10 pork sausage · Blend 111 fresh chorizo · premix dosing + the freezer workflow

MEAT	PORTION	GRIND	STORAGE
pork butt ~70/30	450 g bags	coarse → fine	freeze, months

DOSING

both bags season 25 lb (11.3 kg) — weigh your meat, multiply

BLEND	% OF MEAT	PER LB	PER KG	BAG / NOTES
#10 Pork Sausage	2.0%	9 g	20 g	227 g (8 oz) bag
#111 Fresh Chorizo	4.0%	18 g	40 g	454 g (16 oz) bag — also add vinegar + water per pack

WORKFLOW

same freezer engine as the rest — keep everything cold

- 1 Grind:** pork butt (~70/30), everything **near-freezing**. Pork sausage = **coarse then fine** (uniform); chorizo = **coarse** (or coarse + fine).
- 2 Weigh + dose:** weigh the ground meat, add the seasoning at the **% above**. Chorizo: also stir in **vinegar + water at Legg's pack ratio** — the acid is what makes it chorizo.
- 3 Mix:** mix **1–2 min** until it turns tacky and binds (primary bind = patties that hold) — keep it cold; warm fat smears and goes greasy/crumbly.
- 4 Portion + freeze:** into **450 g** bags, press flat, remove air, label with the date, freeze.
- 5 Cook:** thaw in the fridge. **Pork sausage** — patties or crumble on the griddle to **160°F**. **Chorizo** — crumble and fry until rendered and crisp at the edges.

This is the premix baseline — run it, learn your grind and fat, and it becomes the bar the scratch versions have to beat. **Fat is the texture:** ~30% (pork butt) keeps both juicy; leaner reads dry and crumbly. **Cold is non-negotiable** — chill the meat, grinder parts, and bowl; smeared fat is the #1 way sausage goes greasy and won't bind. **Chorizo needs its acid** — don't skip the vinegar; follow Legg's ratio on Blend 111.
